Data overview:

Source:

- 2020 sales data provided by small business owner
- Detailed item description obtained from Etsy API

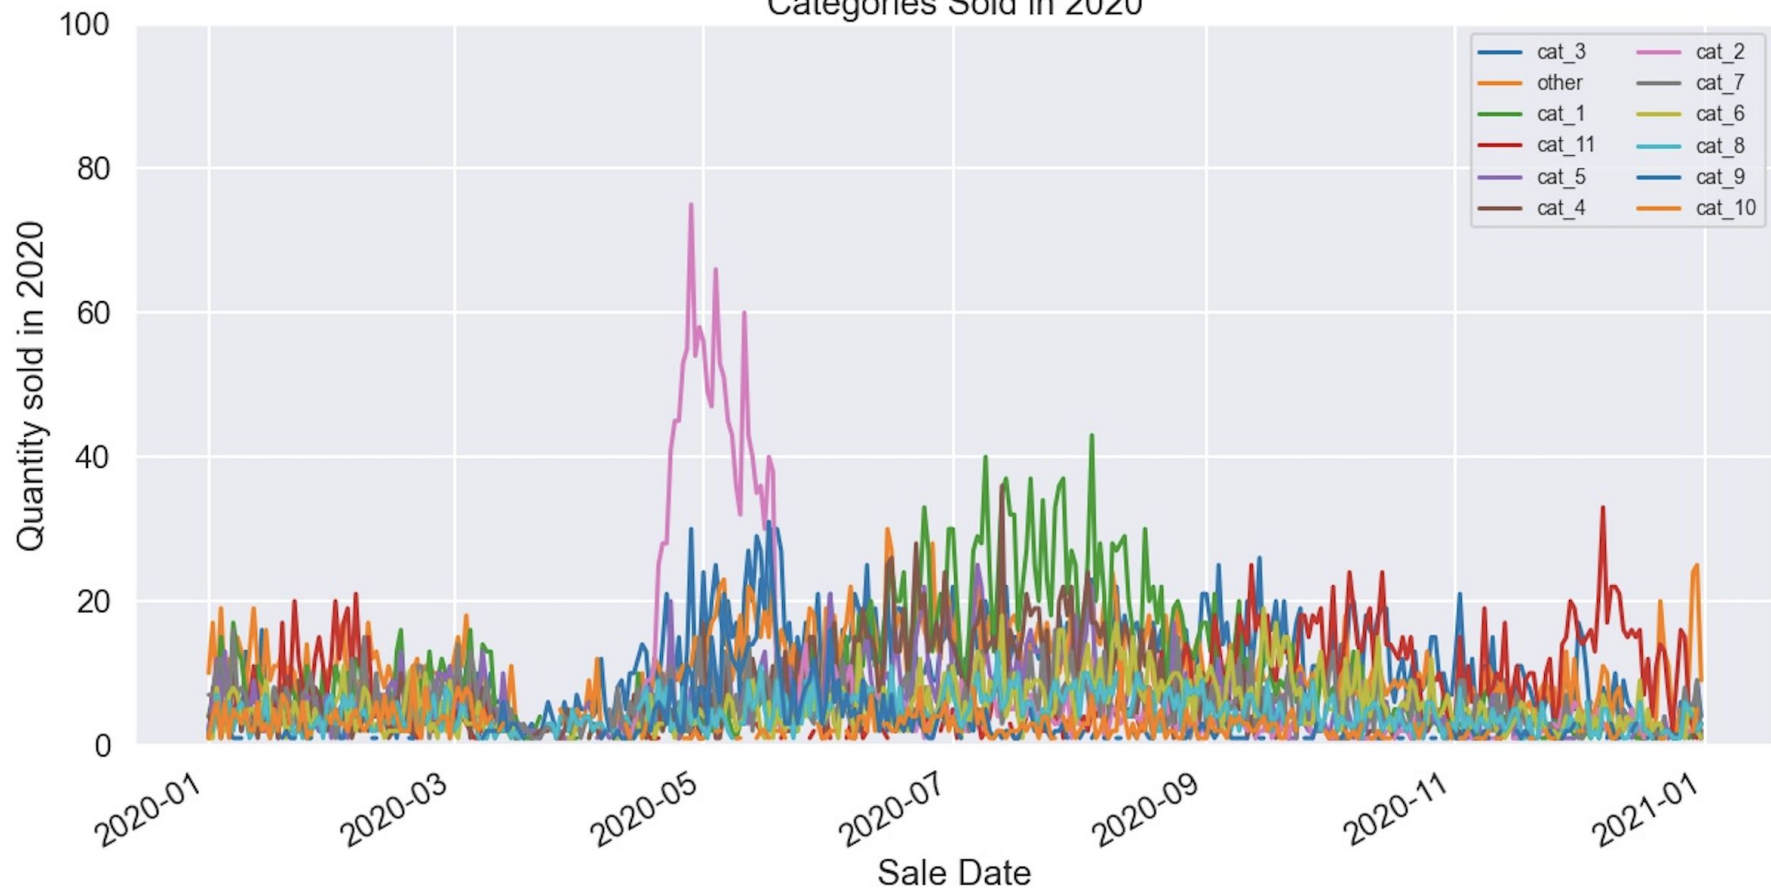

Data volume:

- 26,665 daily sales observations
- 700 item descriptions currently sold on Etsy

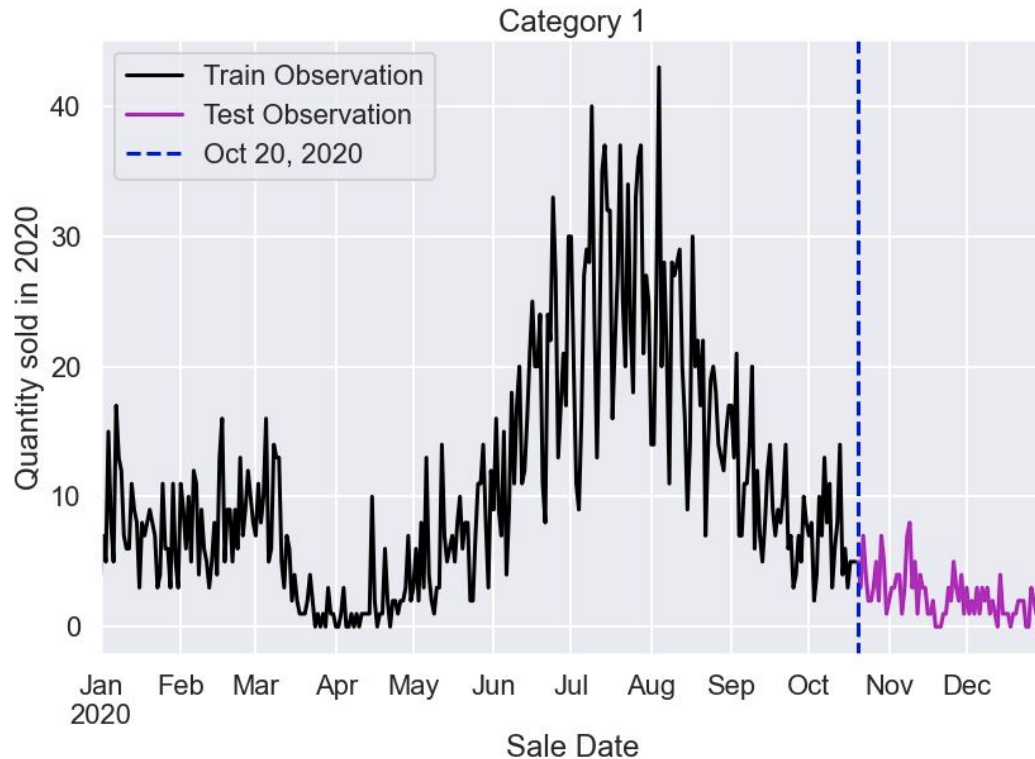

Range of Time: 01/01/2020 - 12/31/2020

Exogenous variable: from Google Trends API

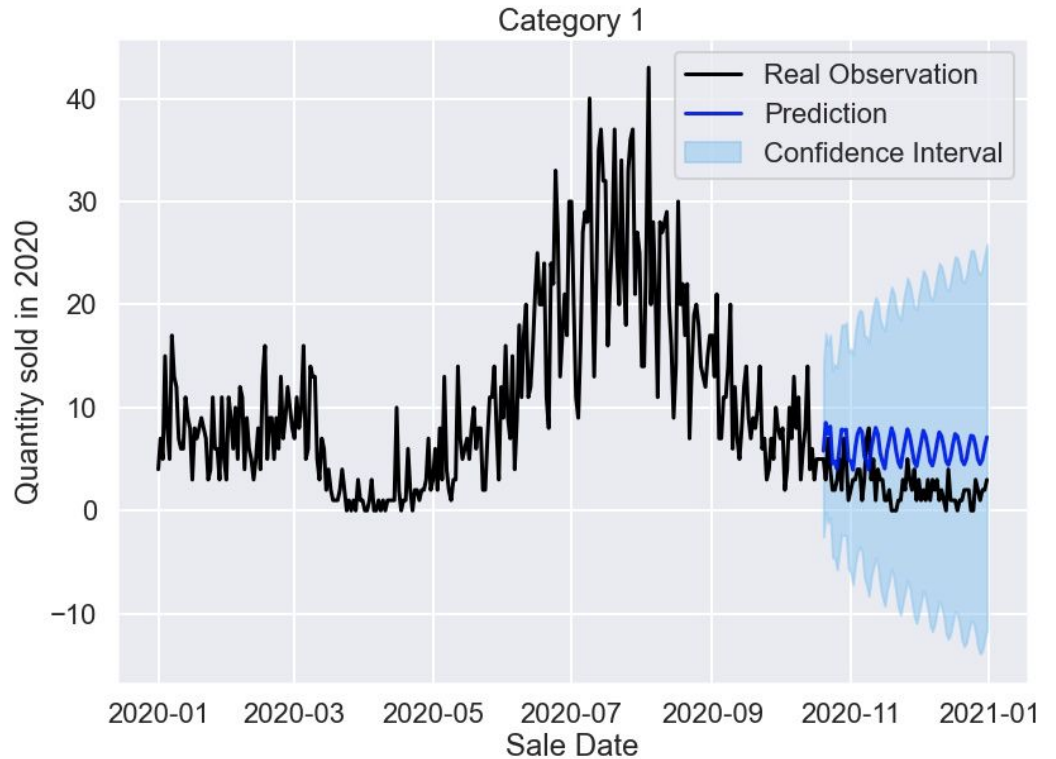

Categories Sold in 2020

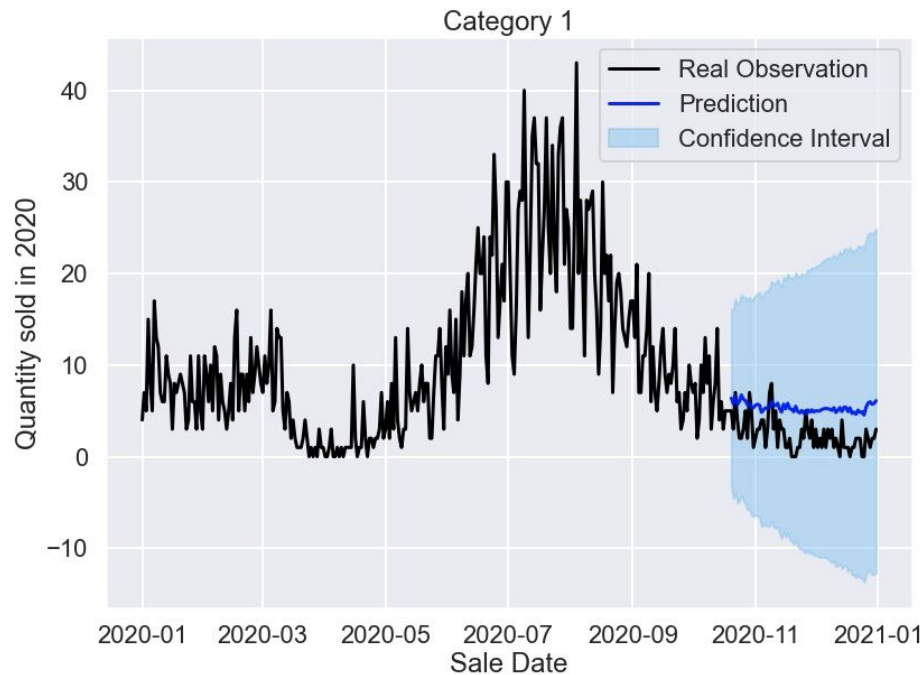

Category 1

Category 1: ARIMA (order=4,1,5)

Category 1: SARIMAX

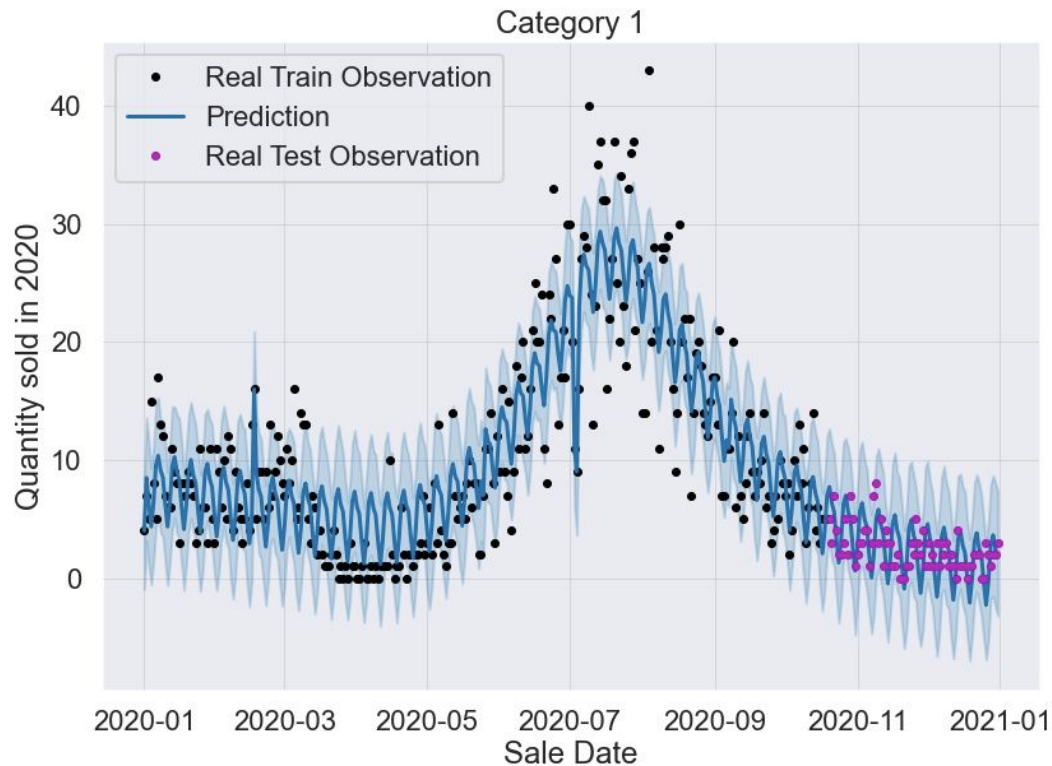

Category 1: FB Prophet

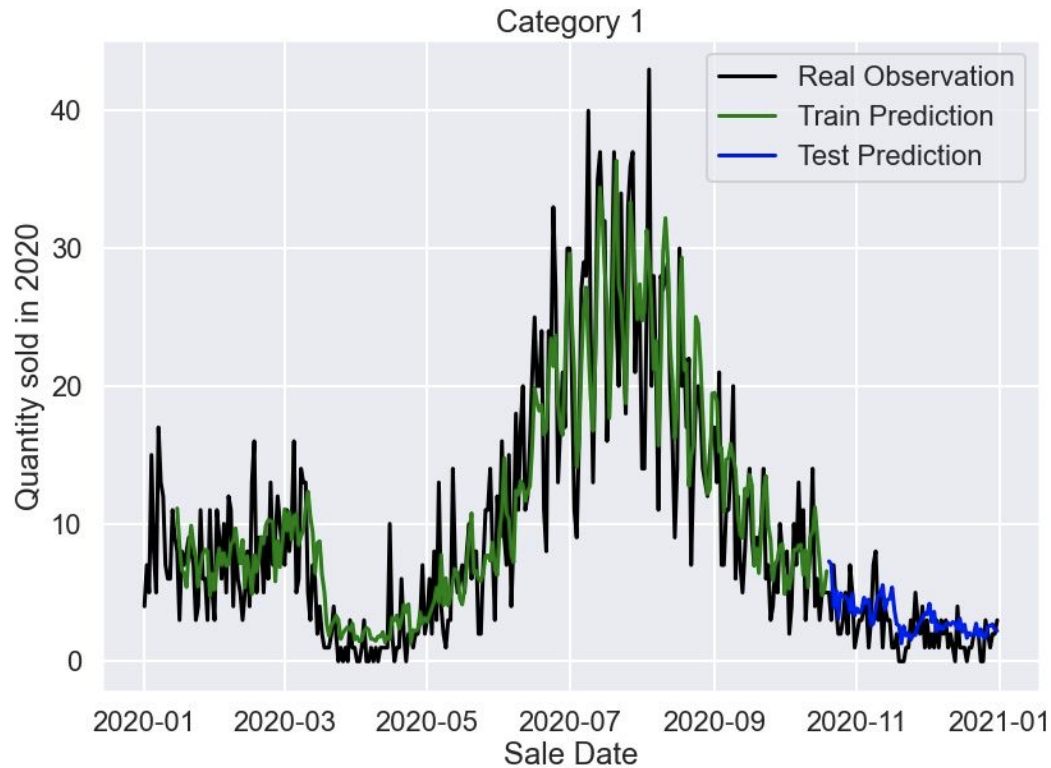

growth = 'logistic'
cap = 100
floor = 0

seasonality = 'weekly'

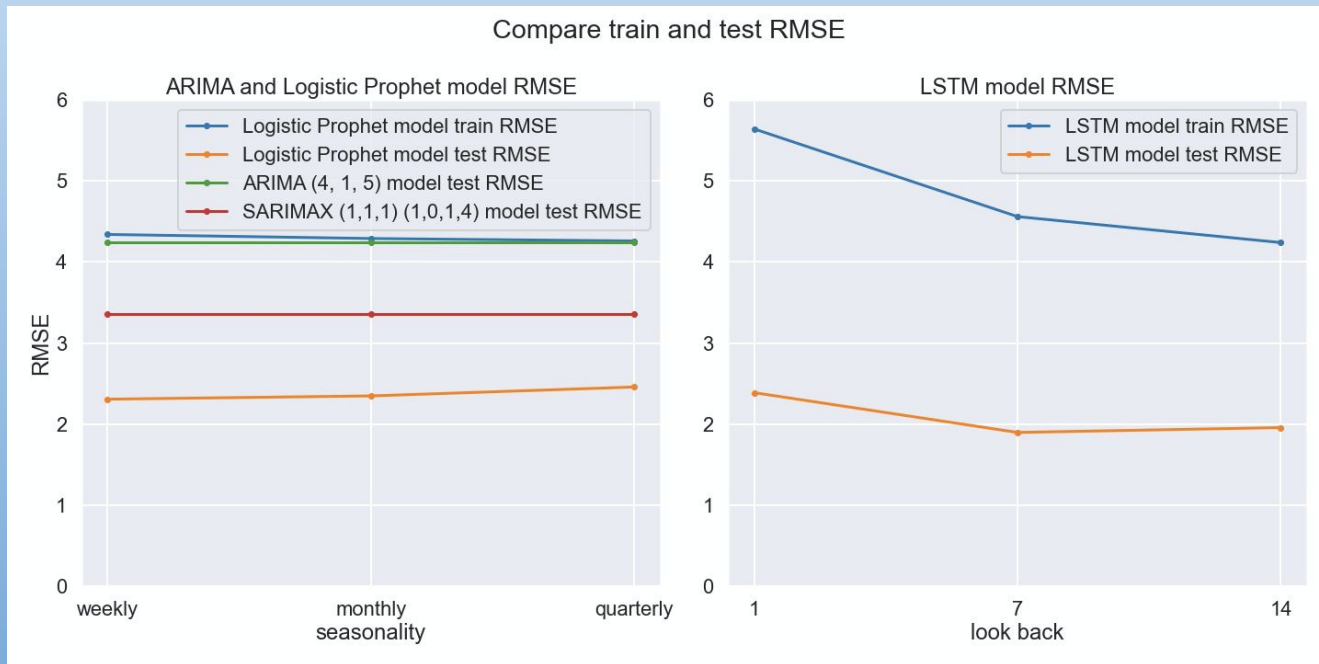

Seasonality can also be monthly,
quarterly, yearly.

Category 1: LSTM Networks (look_back=14)

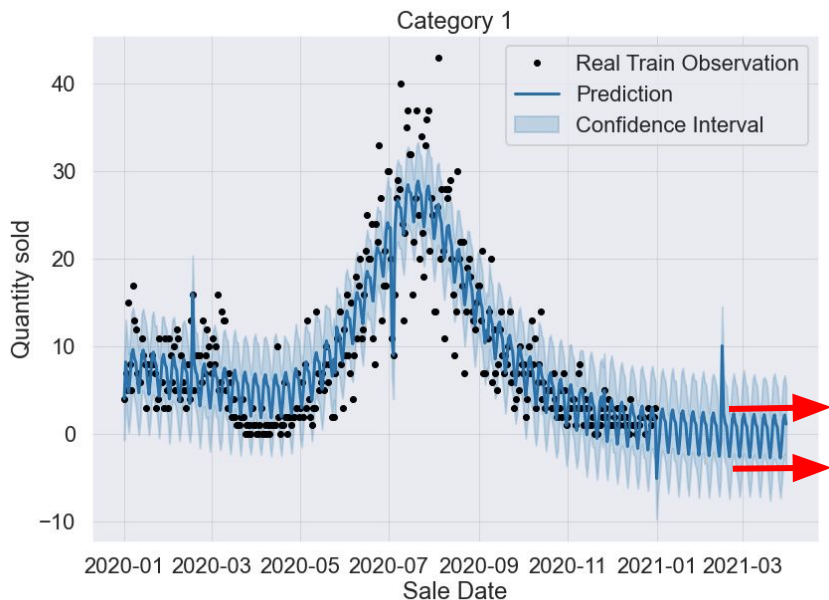

Evaluation: RMSE

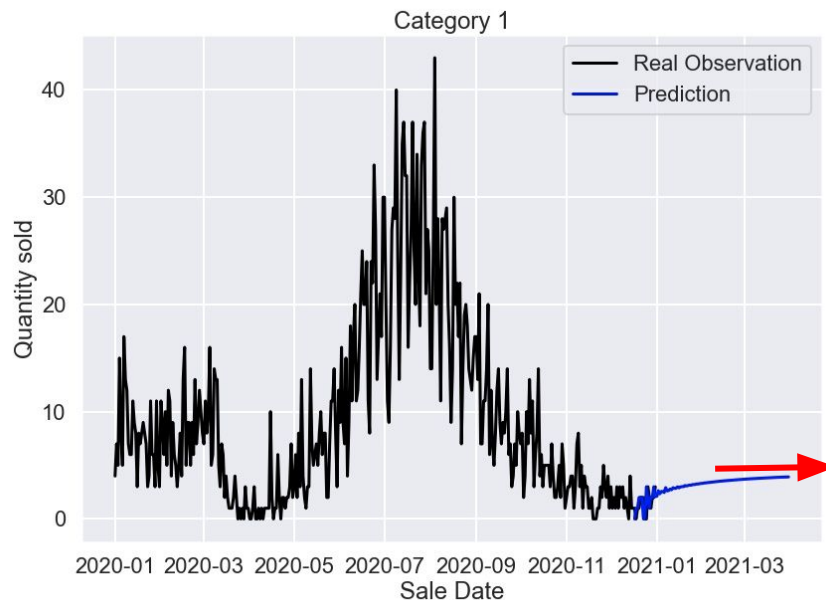

Predict quantity sold until 03/31/2021

FB Prophet

LSTM Networks

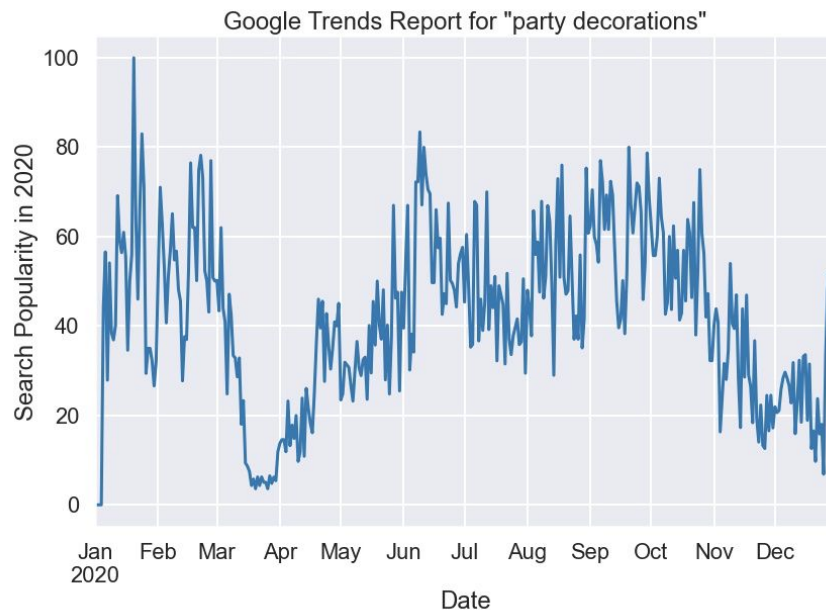

Explanation for seasonal variability

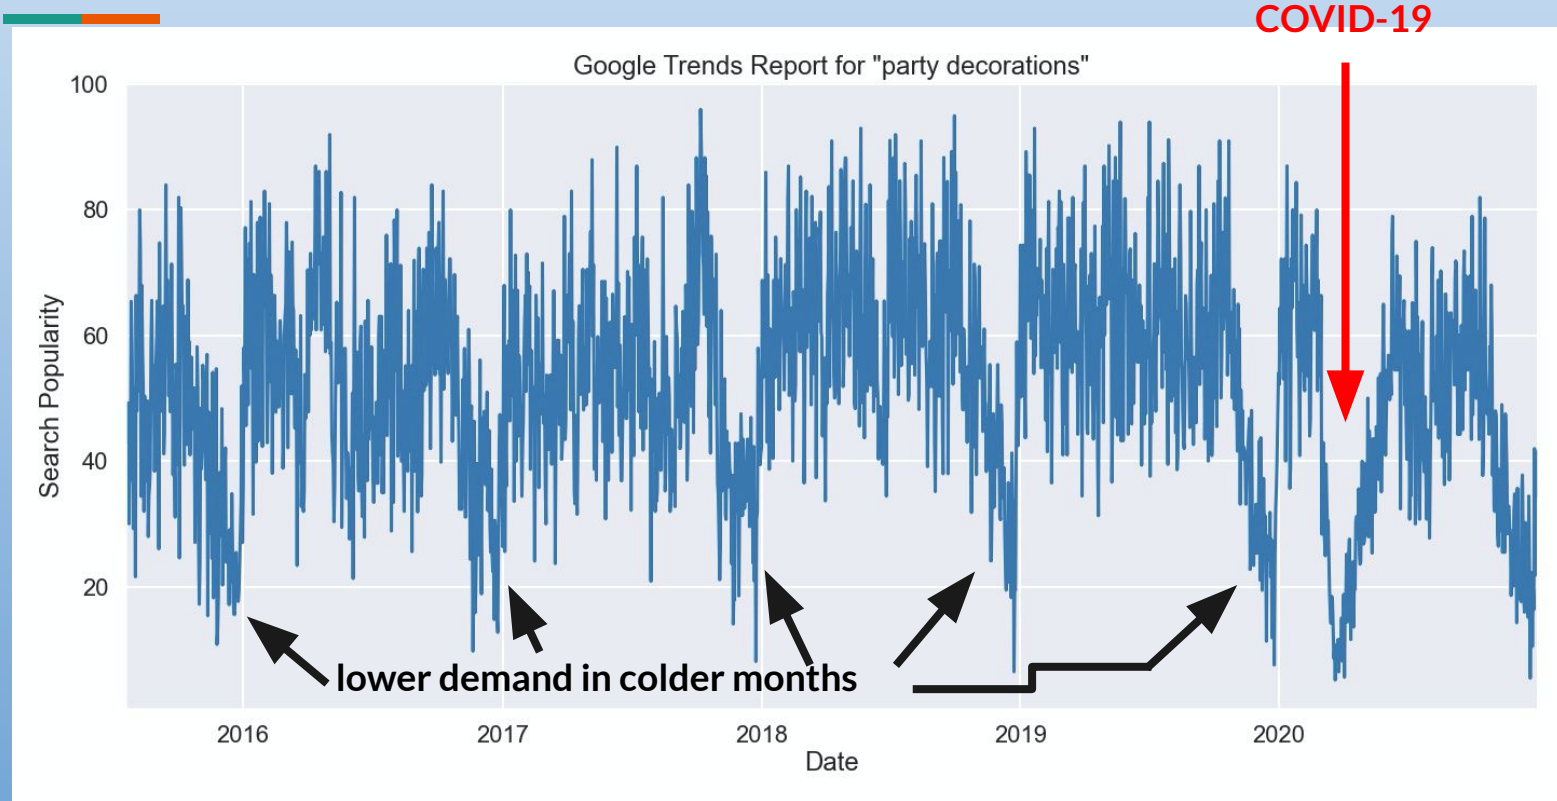

Category 1

Google Trends

“Party decorations” on Google Trends

Next Steps

- Get access to more data (before and after 2020)
- Add more exogenous variable(s), such as weather temperature
- Perform analysis and forecast on exogenous variable(s)
- Add models with yearly seasonality
